

The Global Voice of the Lighting Industry

Jan Denneman

President

Global Lighting Association

Vice-President Philips Lighting

President European Lamp Company federation (since 2001)

President Global Lighting Association (Forum) (since 2009)

Who we are

The Global Lighting Association is a grouping of peak national and regional lighting associations representing over 5,000 lighting manufacturers and US \$50 billion annual sales.

Our evolution

Originally founded in 2007 as the Global Lighting Forum, the new **Global Lighting Association** represents the same members—but with a renewed focus and broader scope, and a willingness to be ever more active and influential participants in shaping how the world around us is illuminated.

Global Lighting Association history started as GLF

GLF MoU signed
1st Brussels 2007

1st Brussels 2007

3rd San Francisco 2009

4th Shenzhen 2010

5th Sydney 2011

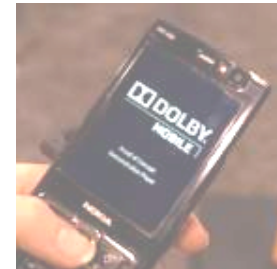

6th Taipei 2012

Our evolution

As technology changes

from analogue to digital

So must we

Global Lighting Association: founded 12th March 2012

6th GLF Taipei 2012 => 1st Global Lighting Association Taipei 2012

What we do

Global Lighting Association

shares knowledge of global trends and legislative developments and opportunities in lighting

What we do

Global Lighting Association

shares information on the activities of individual associations

What we do

Global Lighting Association

anticipates and initiates policies and actions on areas
of common interest

What we do

Global Lighting Association

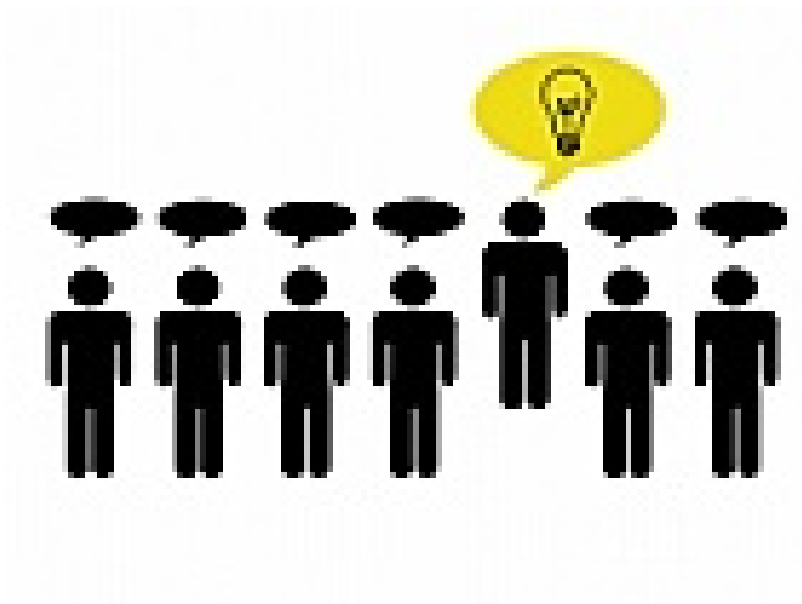

seeks opportunities for communicating with government
authorities and other stakeholders

What we do

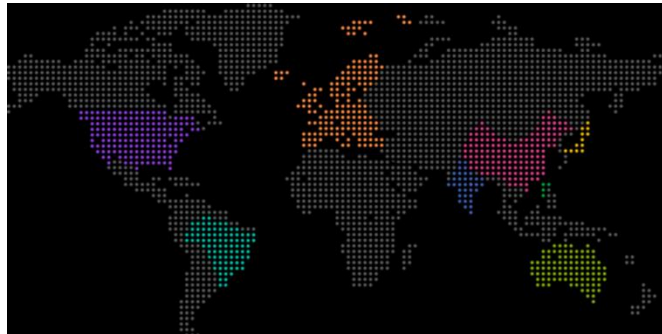

Global Lighting Association

provides governments with relevant product and
market information

Why it works

The **Global Lighting Association** is the lighting industry's largest network. We offer an effective forum to exchange information in a timely manner and present a unified voice for various industry issues and initiatives.

The Global Lighting Forum in 2012

The **Global Lighting Association** has set an ambitious agenda for the upcoming year to effectively address industry issues. At the upcoming major lighting fairs the **Global Lighting Association** will focus on the following topics:

The Global Lighting Forum in 2012

Energy Efficiency

The Global Lighting Forum in 2012

LED Performance Quality

The Global Lighting Forum in 2012

Innovation

Solid State Lighting objectives – LED Committee

Additionally, there is an ongoing commitment from our LED Committee to develop **partnerships** with other organizations active in Solid State Lighting to:

Solid State Lighting objectives – LED Committee

- **Promote** the application of Solid State Lighting (LED & OLED) globally

Solid State Lighting objectives – LED Committee

- Communicate to stakeholders a **realistic picture** of the technology through global case studies

Solid State Lighting objectives – LED Committee

- Create and maintain a **framework** for stimulating the creation and distribution of global information about SSL applications, technology, standards and policies

Our mission

The **Global Lighting Association**:

- promotes the use of sustainable, energy efficient lighting solutions while maintaining and improving the quality of lighting.
- unites on a global level the leading national and regional industry associations for lighting technology.
- functions as a forum for exchange and formulation of technical and policy information and is a recognized authority on issues of concern to the global lighting industry.

Our network

The **Global Lighting Association** represents a remarkable, leading global network of industry leaders. In the upcoming year we are committed to continued outreach to our members and stakeholders—those that influence lighting policies regionally and globally.

Our members around the globe

Get involved

The **Global Lighting Association** welcomes formal cooperation with specific lighting-focused organizations through a **Global Lighting Association - Partner Agreement**. Partners should have a regional or global focus and be committed to exchanging information to best define and creatively approach lighting policies and various issues

Partners may contribute via content or communications expertise and may include associations, governmental bodies, and NGOs
